

The critical path starts with task TEAM-50 and ends with task TEAM-21, as TEAM-51 depended on TEAM-50 and all other tasks were dependent on TEAM-51, as a result, TEAM-21 depended on both TEAM-50 and TEAM-51 to be completed. TEAM-21 also took the longest time to complete out of TEAM-60, TEAM-19, TEAM-26, TEAM-21, as a result, TEAM-50 -> TEAM-21 is the critical path.

Note: TEAM-53, TEAM-54, TEAM-55, TEAM-57, TEAM-58, TEAM-59 are subtasks and need to be done before their parent-tasks are considered to be done, therefore are not considered to be endpoints for the critical path.

To keep our sprint in schedule, we checked up with each other and documented our progress on Discord via standups, and asked for help whenever applicable. We have also set up dependencies on Jira so that we know which tasks need to be completely prior to starting a specific task. Before starting a task, we check the dependencies and wait for its prerequisite tasks to be completed.
