**Community:** This is the home page of our website. The contents on this page are game video clips and images suggested based on the user's activities. The side bar contains the status of the queue and friend list.

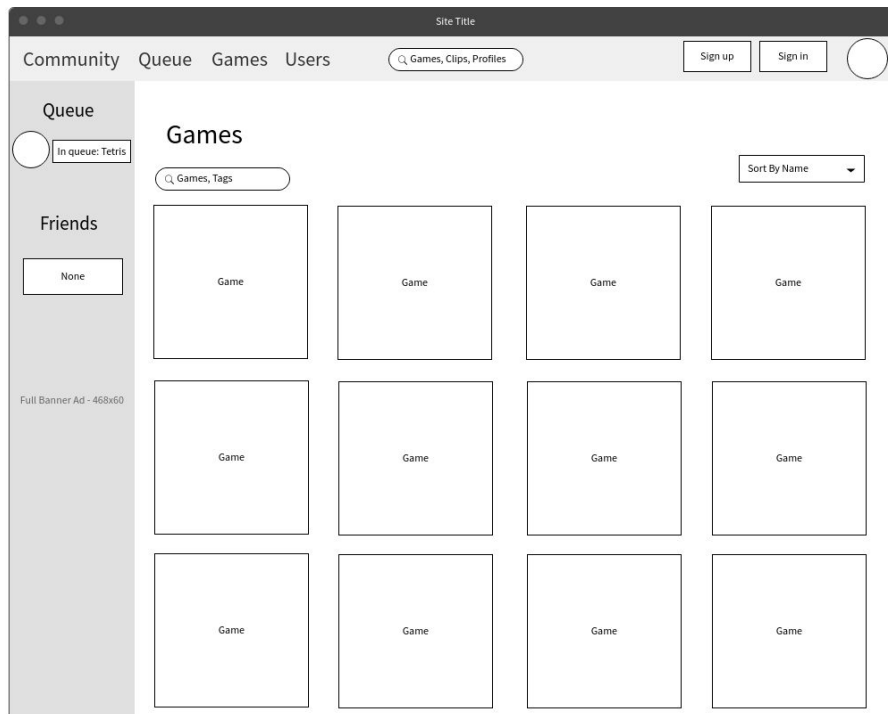

Community Content Page: By clicking on an item in the community page, the user will be taken to a page like the one below. It will display the content, a title, and other users' feedback.
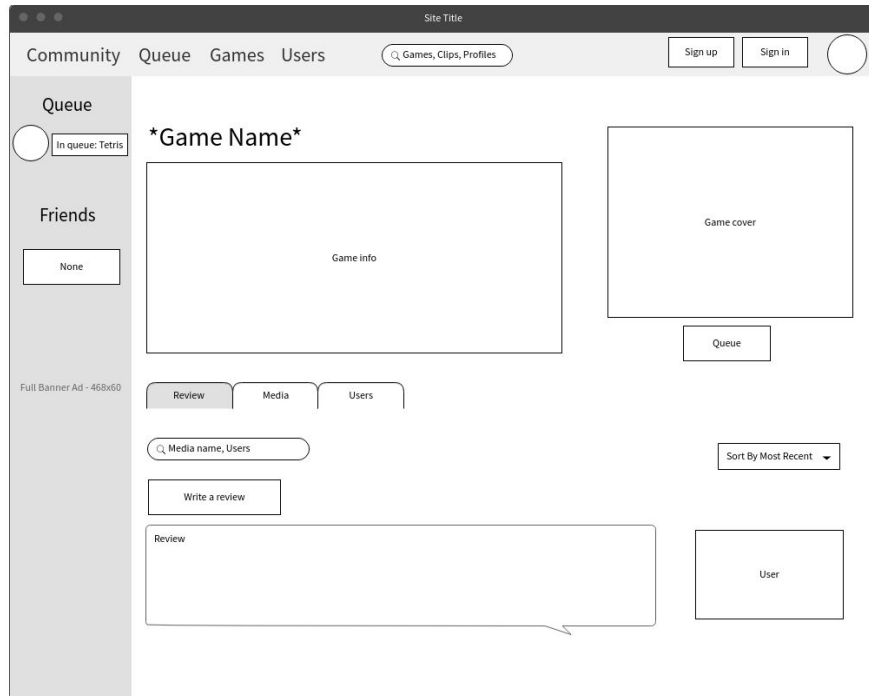

Queue: The queuing/matchmaking page allows the user to find a team of players in the game they want to play. Each player put into a team would have to be actively queuing and their in-game information will be shared with their teammates in order to get into the game together. There exist multiple filter options in order to find specific types of teammates.

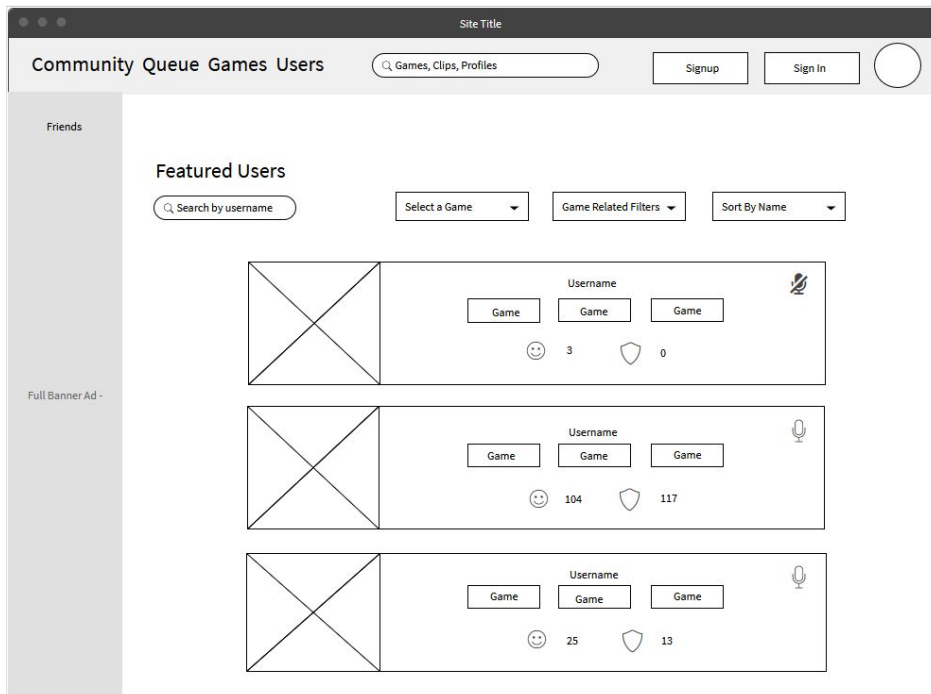

Games: This page shows all the games that an user can queue, review, and related media contents. By clicking on a game, it will take the user to the Game Content Page.

Game Content Page: This page shows all the information about a game. The users will have the option to view/write a review about the game that they have played. Users can check out all of the video clips and images posted by other users about the game. They could also find and view other users' profiles that play this game.

Users: A page that displays some recommended/featured users and allows the user to search for users on the site that play similar games as the player. The user may apply filters such as ranks, in-game hours, number of commendations, etc.

Profile: The user profile page has a Home tab that shows a summary of this user's games, media, and friends. The Games tab shows a list of games this user has played (or queued) or reviewed. The Media tab shows a list of video clips and images uploaded and liked by this user. The Friends tab shows the friends added by this user. The About tab is any additional information they want to add. The profile owner itself has the option to Upload a clip/image. Other users viewing this profile can Rate/Review this user and/or send a friend request.
